

SafeSeal

SafeSeal Pneumatic Tool

Lugaia SafeSeal Pneumatic Tool

With the SafeSeal Pneumatic Tool, a closure system has been developed which is characterized by simple operation, high working safety, universal usability and high quality.

A containment Level OEB 5 (<1µg/m³) is ensured in combination with the SafeSeal closures and the films of the continuous-liner system (CLS: standard sizes see own product sheet).

The SafeSeal Pneumatic Tool is used in end of line packaging applications and complies with the following features:

- Available for SafeSeal closure size M and L
- Automatic pressing and cutting of SafeSeal closures
- Fully pneumatically operated (ATEX-compatible)
- Made of stainless steel
- High security by two-hand operation
- Integrable to existing system
