

Validatable Cleaning Solution

automated interior and exterior cleaning
in existing washroom

SERVOLIIFT
lifetime solutions

Experts in Handling,
Blending and
Cleaning Technology

► interior & exterior washing unit

The SERVOLIIFT washing system guarantees optimal and efficient container cleaning as a fully validatable, automated process. This is based on a 4-fold washing program, which is combined with user and recipe management allowing reproducible washing cycles.

Interior and exterior cleaning of containers can be done simultaneously. The installation of this system is particularly suitable for existing washrooms.

- fully validatable internal and external cleaning
- requires only little space in the washroom
- can be combined with separate drying station
- one after the other or simultaneous inside and outside cleaning of containers
- water consumption approx. 50 l/min for consecutive and 100 l/min for simultaneous internal and external washing
- detection of the correct container position (collision prevention), optional container-height detection with automatic loading of specific recipe parameters
- secured door
- recipe controlled system with logging and security access
- **easy installation in the existing washroom**

Additional available options:

- control for main and dosing pumps for adjusting the volume flow and for flow-dependent dosage of the cleaning agent
- design according CFR 21 part 11
- wash-lowering device with automatic positioning according to the container size
- additional connection for the internal cleaning of barrels
- steam heat exchangers

The separate SERVOLIFT Drying Station CSD is available as a supplement to a full-fledged cleaning system
